

HERE'S THE **BEST** **OFFER** YOU'LL HAVE **TODAY!**

Our good friend, Brian Walt, W6 Cattle Co., Collyer, Kansas, is a diversified commercial cow-calf producer and cattle feeder. For the past few years, Brian has offered several outstanding, home-raised commercial Angus heifers in our spring production sale. As a cow-calf producer, cattle feeder and backgrounder, Brian recognizes the added value of BJ genetics throughout the supply chain, and would like to bid, buy, or partner on your commercial calves.

ELIGIBILITY:

- Steers or heifers
- Weaned to 800-850 lb calves

REQUIREMENTS FOR ELIGIBILITY:

- Advanced notification on calves to sell
- Calves must receive two vaccinations for respiratory disease (pre-weaning & branding)
- Calves must be sired by bulls purchased in BJ Genetics sale

WHAT WE DO:

- With advanced notice, we are willing to bid, buy or partner with seller.
- We are willing to share the feedlot data and carcass summary.

We will background weaned calves until they reach appropriate weights to enter the feedlot. Finished cattle will sell through USPB and be processed at a National Beef plant. We will share all the data, regardless of a seller's level of participation. Seller's choosing to partner with us on their calves will receive their pro-rated share of profits after all expenses have been deducted.
